i-Cats

It's all you need to manage your pedigree book and cat shows

i-Cats is the integrated pedigree book and cat show management system used since 2013 by the Swiss cat federation FFH (Fédération Féline Helvétique). The system is fully FIFé compliant and does support all activities as described in the "FIFé Breeding & Registration Rules" and the "FIFé Show Rules". The system has been developed by FFH and TeamSolutions AG.

Key Functionality

General
- Support of various members within a cat federation
  (central pedigree book but individual show registrations and cat show management)
- Support of various languages in parallel (currently German, French, Italian and English).
- Support of various user types (pedigree book, show registration, show management, Admin etc.)
- Administration of races, colors, texts and others

Pedigree book
- Registration of cats, owners and breeders
- Generate pedigrees, title diplomas and breeder certificates
- Various reports (cats per owner, bred cats per breeder, kittens by cat etc.)

Show registration
- Register cats for a show
- Judge assignment
- Generate catalogue, confirmations and judge reports
- Various reports (list of all registered cats, list of cats per judge etc.)

Show management
- Register and edit results using scanned judge reports.
- Print certificate and judge report in one go
- Various reports (list of absentees, list of all results, BIS list for judges, BIS list for presenter etc.)

Key Benefits

General
- Easy, fast, secure and reliable way to manage big amounts of data
  (currently we have around 150'000 cats, 45'000 owners and 6'000 breeders registered)
- The system used on cat shows is an offline version to avoid any risk with unavailability of web-access on the show.
- Low ongoing operational costs

Pedigree book
- Simple way of managing cats, owners, breeders, transfers, awards etc. in an integrated way

Show registration
- Elimination of significant manual work (everything is managed by the system)

Show management
- No carbonless copy paper is required anymore as Judge reports are registered electronically

Technology

Easy to use internet application
- Accessible by all standard web browsers
- Supports iOS, Android and Windows Phone devices
- Documents and reports are provided either as PDF, Word or Excel file

Accessing i-Cats is restricted
- Access control is user and role based
- Users require a password authentication to login

i-Cats is multi language capable
- For the entire user interface and dialogues
- For application data like races, colors, titles etc.
- New languages can be easily included
- All texts are stored in the database and easily to maintain

Offline functionality
- Run a show without internet connection
- All you need is a standard Windows laptop having IIS web server and SQL Server Express installed
- Prior to the show all relevant data can be imported from the internet hosted main database

Developed with modern web technology
- Microsoft's ASP.NET Framework
- Microsoft SQL Server
- Microsoft IIS Web Server

Our Offer

i-Cats will now be offered by the FFH to other cat federations under the following licensing models:

1. Individual instance: A one to one copy will be used and can be fully customized by the customer. No data exchange between individual instances is possible.
2. Integrated system: New customers will be integrated to the existing i-Cats. Customization is limited to reports and languages. Full data exchange between various customers is possible.

The yearly licence fee will be agreed based on size of customer's pedigree book and individual situation. All one off costs for customization and migration are based on effort.

Your Choice

	Individual Instance	Integrated System
Investments		
One off costs		
Full customer specific installation	✔	O
Customization limited to reports	O	✔
Data migration	✔	✔
Running costs		
Application hosting	✔	O [1]
Software maintenance contract	✔	O [1]
